Available for part-time remote engagements and fixed-scope projects.

Profile

Software engineer and founder of Biel.ai. I build retrieval-augmented generation (RAG) systems and Model Context Protocol (MCP) integrations that turn documentation and product knowledge into answers for people and context for AI agents.

Skills

AI and agents: LangGraph, LangChain, LangSmith, OpenAI, Anthropic, MCP.

Retrieval and reranking: Typesense, Qdrant, Pinecone, Cohere.

Engineering: Python, Django, FastAPI, TypeScript, Git, GitHub Actions.

Documentation: Docs-as-Code, OpenAPI, Sphinx, Docusaurus, GitBook.

Recent experience

Founder | Biel.ai | May 2024 - Present

- Build and operate an AI product that turns technical documentation into source-linked answers, search, and context for AI agents.
- Develop retrieval pipelines, model integrations, answer quality checks, and MCP access for product knowledge.

Principal Consultant, Documentation Engineer | TechDocs Studio | Jul 2023 - Present

- Deliver documentation platforms, migrations, reference generation, and publishing automation for teams including Coiled, Voxel51, and Inditex.
- Structure documentation for developers and AI tools. Assess content gaps, retrieval context, and answer quality.

Lead Technical Writer (Contractor) | SNGULAR | Jun 2021 - Jul 2023

- Led a Docs-as-Code migration covering 45+ software products for Inditex. Designed the architecture, migration strategy, templates, and writer onboarding.

Documentation Engineer (Contractor) | ScyllaDB | Sep 2020 - Aug 2021

- Built documentation tooling across 20+ repositories, custom Sphinx extensions, and automated API and CLI reference generation.

Education

Master's in Artificial Intelligence | UNIR | Sep 2026 - Present (in progress)

Bachelor's in Business Administration and Management | UOC | 2017 - 2024

Bachelor's in Informatics Engineering | UPC | 2012 - 2017

Certifications

ITCQF Certified Technical Communication Professional | 2022

Cambridge Certificate in Advanced English | 2014
